

My Acrylix® Clear Stamps from Close To My Heart Features and Benefits Overview

Not all clear stamps are created equal! Close To My Heart My Acrylix stamp sets reflect the production expertise, the variety of designs, and the quality materials that guarantee a superior stamp set that will deliver consistently beautiful, lasting artwork. **Three areas make Close To My Heart My Acrylix stamps clearly the best choice:**

1. OUR PROCESS

Close To My Heart began producing clear polymer stamps in 2003, one of the first to offer clear stamps on the market. We use state-of-the-art manufacturing equipment in our on-site production facility. Our team are experts in polymer work, and they know how to handle the materials through production, carefully controlling temperature, moisture, production speed, and the many other variables that affect quality. Our process also allows us to produce very finely detailed stamp designs that many other manufacturers can't duplicate. Base-and-shade stamps, distressed designs, toile- and lace-style artwork, and even tiny script fonts, to name a few, retain incredible clarity and detail you won't find in most other clear stamps on the market. The depth and cut of the stamp grab the ink well, but minimize blurring and "fill in." Such a labor-intensive process ensures our high quality standards.

2. OUR MATERIALS

While clear polymer is available from a variety of sources, there are many levels of durability, flexibility, and quality that may be initially indistinguishable to the human eye. As the leader in clear stamps, Close To My Heart has continued to refine our materials and improve their performance and aesthetics, using the top grade of polymer produced today. We have put the polymer through rigorous testing including aging and environmental tests to ensure that the stamps you buy, with proper care, will last for generations. Our stamps can be easily stretched, arched, or angled for a variety of different "looks" in artwork, where as many other companies' products are stiff and rigid, with a strong smell, too sticky or not sticky enough, and yellow easily within a few weeks of purchase.

3. OUR DESIGNS

With approximately 450 "active" stamp sets at any time, Close To My Heart offers more than 4,000 individual designs in My Acrylix clear stamps. Many of these designs were created to complement each other, so customers can build a library of sets that coordinate in themes and sentiments. Our packaging is also unique on the market—not only does the flexible envelope protect the stamps inside, it allows for convenient storage, organization and retrieval. Our unique carrier sheets include all designs already cut (many manufacturers require the purchaser to cut out the stamps), and make it easy to view the positive design.
